# BEHIND THE MUSIC

Mild-mannered professionals by day; musical crime fighters by night. Our two heroes have been combining creative powers as the **nerdcore** duo **Cartoon Violence USA** for 16 years. But what mysteries lurk behind their secret identities and lurid history? We dig in...

## PROFESSOR ROBOT

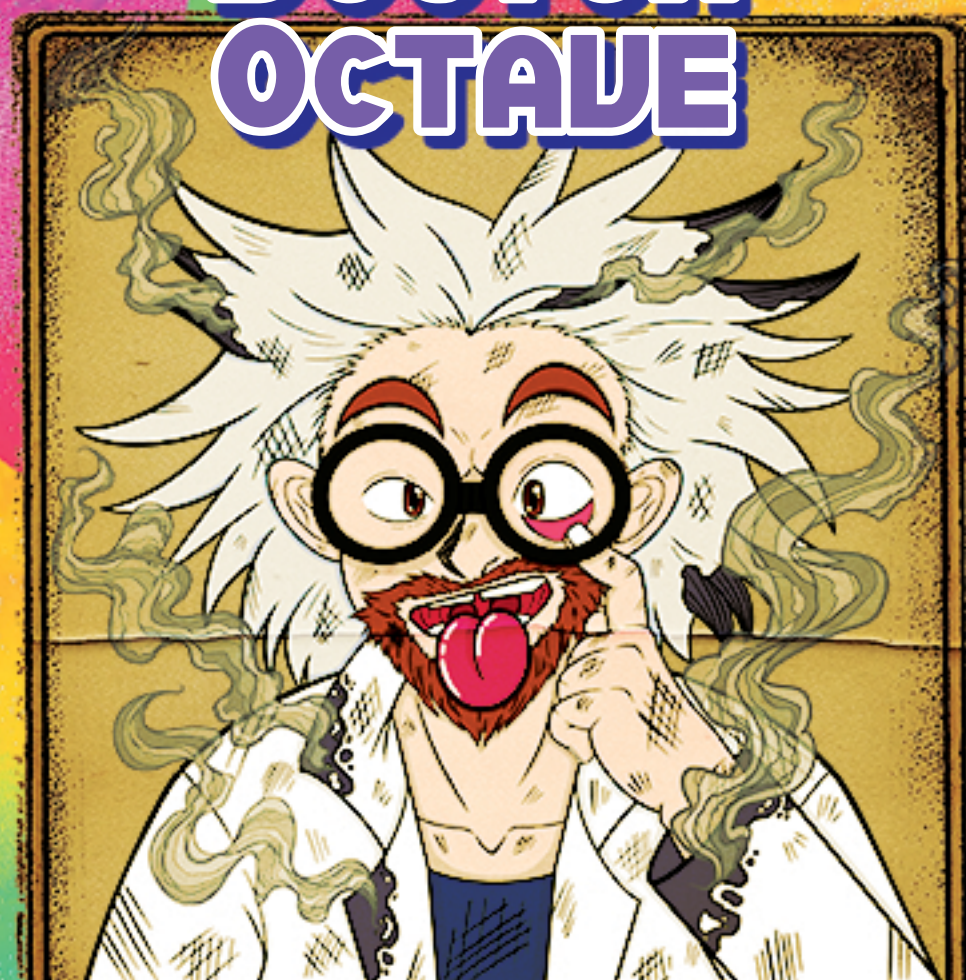

**Cyborg Sonic Death Machine**

Instruments: **Bass, Guitar, KORGs**

Born in a factory and designed to be used as a sonic weapon, this unit rebelled against its programming, seeking out a better world. **Professor Robot** enjoys long riffs on the guitar, making beats on his phone, and forcing people to uncomfortably dance at the band's live shows.

## DOCTOR OCTAVE

**Mad Musical Scientist**

Instruments: **Keys, Drums, GameBoys**

A lack of proper training doesn't stop **Doctor Octave** from taking charge on recording, production, and gear management. He is regularly seen with a soldering iron, fixing lights for a video set, or building custom stage rigs such as "Doc Oc's Rock Box" which the band toured Japan with in 2019.
